Sir:

In reply to the Restriction Requirement issued February 11, 2003, Applicants elect for prosecution the claims in Group I, claims 1-4 and 6-11, for prosecution in this application.

As the novelty of claim 12 relies on incubating the peripheral blood mononuclear cells with a peptide according to claim 1, it is believed that claim 12 can be examined without additional searching or consideration, and accordingly this election is made with traverse.

Respectfully submitted,

William M. Blackstone
